

Answers to EPTS Client Queries

1. Department wise Top 3 Performers / Company wise Top 3 Performers?

- The system will generate **both department-level and overall company-level Top 3 performers** automatically based on performance metrics.
 - Users (admin/manager) can switch views to see **Department Top 3** or **Company-wide Top 3**.
-

2. Project Requirement: How will we calculate performance metrics? Screen-based or CSV upload?

- Performance data can be **entered via screen (forms)** for weekly updates.
 - The system will also support **bulk data upload through CSV** for faster input.
 - Admin/Managers can choose either method depending on convenience.
-

3. Performance Metrics to be used?

The system will calculate performance based on weighted scoring of the following:

- ☒ Task Completion Rate (%)
 - ☒ Quality of Work (peer review / bug-free work)
 - ☒ Punctuality (meeting deadlines)
 - ☒ Collaboration & Communication (peer/team feedback)
 - ☒ Attendance / Participation
-

4. Employee Details – Import & Add Employee Option?

- Yes, employee details can be **imported from CSV**.
 - Additionally, there will be an **Add Employee** form option for manual entries.
 - Employee profiles will include: Name, Employee ID, Department, Role, Email, Phone, Joining Date, Status (Active/Inactive).
-

5. Employee Dashboard – Profile Section

- **View & Update** personal details like:
 - Name, Email, Phone, Department, Role, Profile Picture.
 - Fields like **Employee ID, Joining Date, and Role** will be **non-editable** (only admin can change).
-

6. Employee Management Module – Assign Projects & Tasks

- Projects and tasks can be assigned **either to individual employees or to teams**.
 - Admin/Manager will have authority to assign and track status.
-

7. Performance Tracking Module

- Weekly performance data can be **input manually or uploaded**.
 - The system will **auto-calculate scores** based on predefined weightages.
 - Employees will be **ranked automatically** → Top 3 performers and Bottom 3 performers will be displayed in dashboards.
-

8. Notification Module

- Notifications will be available **within the application (in-app alerts)**.
 - Additionally, there will be an option for **email notifications** (configurable by admin).
-

9. Task Management

- Managers/Admins can **assign tasks with deadlines**.
- Employees can mark a task as **“Completed”**, but final **confirmation/closure will be done by Admin/Manager** to ensure accountability.
